

Automotive Soundproofing

Too much road noise, droning and vibration?

Want to enjoy your car experience?

Then create the feeling with some quality high performance Australian made soundproofing materials, fire rated with thermal qualities.

Decidamp - dampens sheet metal and removes the energy; the vibration and resonating are then diminished.

Use on floors, firewall, boot and door panels.

1300 x 1000 x 1.3mm foil faced self-adhesive sheet, cut with knife

Sorberdamp - vibration dampening of sheet metal, noise reduction and absorption.

Use in engine bay area, bonnet and firewall.

1300 x 1000 x 25mm AGC foil faced self-adhesive sheet, cut with a knife

Soundmat - reduce the lower frequency road noise with this 8kg decoupled flexible heavy duty floor grade barrier, which is hard wearing and abrasion resistant.

Use on floors and firewalls, vans, buses, trucks, tractors etc.

2500 x 1350 x 10mm sheet size, cut with a knife.

DIS8 – decoupling strips used between substrates to reduce vibration and noise transfer.

Floors of vans and buses underneath the plywood.

500 x 250 x 2mm double sided self-adhesive strips, cut with a knife.
