

Now the perfect way to divide areas and control your workspace is clear.

Our ingenious SonicClear Screens and Barriers create instant zones, contain noise and airborne contaminants.

Need a fast, effective and cost efficient factory or warehouse zoning solution?

Look no further than Flexshield's SonicClear Industrial curtain walls, the modern way to divide a workshop into usable, independent sections.

You can use SonicClear screens to create permanent barriers, or divide large areas into several smaller, purpose-built areas to maximise available space.

Alternately if you'd like more flexibility, they can be hung as sliding sheet curtains so that areas can be enclosed or opened up at will, depending on your requirements.

Made from only the strongest UV-resistant and anti-corrosive materials, they can be employed as physical barriers to control and contain noise, dust, fumes, splash, odours, insects, birds and rodents, paint spray and other contaminants, inclement weather and more.

SonicClear curtains – noise reduction and access

**Full NATA
Attenuation

Working wonders!

We have fitted those SonicClear curtains in the noisy area and its working wonders. Definitely the noise level has gone down. I haven't had a chance to take some readings...but people in the whole area are happy and satisfied with the solution.

*Jigar Shah
Schneider Electric*

A big difference!

All SonicClear screens have been installed and the guys love them. They make a big difference to the sound levels in the workshop...thanks!

*Robert Drysdale,
Power Equipment Pty Ltd*

Very, very happy!

Very, very happy with the SonicClear Curtains. The guys who installed them came in and had them up, done and dusted in about 2 hours so that was fantastic! They are working very well too.

Richard Watkins, SGE

First class service

Flexshield from initial contact to delivery of my SonicClear curtains, displayed nothing short of absolute first class service. The product itself was expertly fabricated to the highest degree. Extremely happy customer who would, without hesitation, recommend to anyone in the market.

Benjamin T.

Made to measure

Your SonicClear Screens and Barriers can be custom made to suit your exact size and specifications. They are easy to install and provide immediate results.

Flexshield can supply the curtains in kit form with step-by-step instructions, or we will gladly install them onsite.

We also manufacture a complete SonicClear support system that will take care of all your fixing and support requirements.
