

Silencer Wall Soundproofing

Do you hear through the wall? 😞

Bedroom, toilet/bathroom and entertaining spaces where you need privacy! 😊

This high performance damped noise barrier is only 12mm in overall thickness. Provides excellent vibration damping of low frequency structural borne noise and significantly reduces noise transfer with an Rw33.

Subdue X12/2000 is a high performance acoustic panel with a dense viscoelastic damping core and ply finish. Panel size 2400 x 1200 x 12mm and is cut with wood working tools on site, mechanical fasten and polyurethane adhesive to attach to the wall.

All sources of flanking noise should be considered and if you have any doubts, then please seek the advice of an acoustic consultant for a qualified judgement.

Budget price for 3 sheets on a standard wall 2400H x 3600L - \$1,100.00 + GST

Acoustic panel finishes to absorb noise as an alternative to painting... be surprised by the options available.
